

1.Mention the principle of ISO 9000.

**Answer:**

ISO 9000 is based on eight core principles:

- Organizations must focus on their customers by understanding current and future customer needs.
- Leaders within the organization must create and maintain an environment in which people can become involved and fulfill the organization's objectives.
- People at all levels are important to the organization.
- Activities and resources are best managed as a process.
- Organizations have many interrelated processes, which must be understood and managed as a system.
- The organization should continually improve its performance.
- Decisions should be well informed and based on real data and information.
- An organization and its suppliers are in a mutually beneficial relationship.

## Easy Way to Remember ISO 9000's 8 Core Principles for Exams

Use the mnemonic: "C-L-P-P-S-I-D-S" to recall the principles quickly!

- ♦ **C - Customer Focus** → Understand customer needs.
